

Java Notes

1. Introduction to Java

- Java is an object-oriented, platform-independent language.
- Used in web, mobile, and desktop applications.

2. Java Basics

- Syntax: class-based, strongly typed.
- Data Types: int, float, char, boolean, String.

3. Control Structures

- if-else, switch, while, for, do-while loops.
- break and continue for flow control.

4. Object-Oriented Concepts

- Class, Object, Inheritance, Polymorphism, Encapsulation, Abstraction.
- Constructors and method overloading.

5. File I/O and Exceptions

- FileReader, FileWriter, BufferedReader, Scanner.
- try-catch-finally blocks, exception hierarchy.
